

Maury Microwave: Empowering the Future of Connectivity

Best-in-Class Solutions That Complete Your Lab

Maury Microwave is your trusted calibration, measurement, and modeling solutions partner. We collaborate closely with customers, embracing their objectives as our own to empower innovation from RF through sub-THz – your success is our success. Whether launching a new semiconductor technology or satellite payload, our calibration, calibration validation, measurement, measurement verification, modeling, and data analysis solutions ensure the right decisions are made every step of the way.

We understand that the quality of data drives the quality of decisions. Leveraging our measurement science expertise, we identify, create, and supply each element in complex measurement systems to ensure accuracy and repeatability. Our comprehensive, integrated approach, from initial calibration and verification to advanced instrumentation hardware to precise measurement and analysis, enables innovators to confront the barriers facing the development and execution of next-generation wireless technology.

Trusted Since 1957

Maury Microwave: Empowering the Future of Connectivity

Our Portfolio

The Maury portfolio includes amplifiers, power measurement and phase noise analyzers, cable assemblies and precision interconnects, calibration and verification kits, advanced channel emulation, impedance tuners, RF power meters and sensors, noise generators, signal generators, and software platforms to optimize your workflows.

Together, these solutions support accurate calibration, measurement, and modeling across device characterization, system validation, and production testing.

Our Vision

Our vision is an interconnected world where wireless technologies are reliable and efficient.

Our Mission

Our mission is to give our customers confidence in their RF through THz measurements and models. We accomplish this by providing best-in-class and fully-proven characterization solutions, components, and services. We help the world's leading manufacturers in the wireless technology chain build better products and bring them to market faster.

Our Values

Service to our customers, partners, and teammates.

Passion and Determination in our work.

Mutual **Accountability** to our goals and commitments.

Commitment to our business objectives with integrity and accuracy.

Nurturing our **Employees** growth.

Always being part of the **Solution.**
